Slight addition to serhio's answer. In Acrobat Reader DC (released in 2015) Open your document; Go to the Window => New Window; Drag and drop the tab of the new window on to the

When I open any files (xls, orxlsx) in Excel 2007, excel acts like it's a read only file, essentially creating a new file with the name plus a 1 on the end... Eg. I open NewDoc.xlsx Excel

2 I have managed to find a solution, to get rid of "Open File - Security Warning" for all files of specific extensions, one can use Local Group Policy Editor to do it. Here is how: Press Win + R,

So as a workaround, if you want to later open another sheet on Desktop 1, go to the instance on that desktop (open a new one, if closed) and then click on "File -> Open" to open a new

The ADI file format is proprietary. Doing a quick web search I found AOMEI's own documentation on this topic, and the 1) confirm that this feature is only available in the paid-for

From time to time someone sends a file that comes in the extension of LE. How do I change this or open this? I think they might be using Microsoft Word or something like at the office. I

73 I generate a CSV file with an extension .csv in which every piece of data in one line is separated with a comma: 1,2,3,4 1,2,3,4 The file is sent via email and I want that when a customer

When opening files from file explorer or command line/scripts, and Excel is already open, there is a significant delay before the file finishes open (about 3s, sometimes up to 10s).

How can I find out which process is locking a file or folder in Windows? For instance, when trying to delete a folder, Windows reports this: The action can't be completed because the folder is
